

crypto_aegis128_aesni
_decrypt

crypto_aegis128_aesni
_encrypt

crypto_aegis128_aesni
_crypt

```
graph LR; A[crypto_aegis128_aesni_decrypt] --> C[crypto_aegis128_aesni_crypt]; B[crypto_aegis128_aesni_encrypt] --> C;
```

The diagram illustrates a relationship between three cryptographic functions. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'crypto_aegis128_aesni_decrypt' and the bottom box contains 'crypto_aegis128_aesni_encrypt'. On the right, there is a single gray rectangular box with a black border containing the text 'crypto_aegis128_aesni_crypt'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both the decrypt and encrypt functions are implemented or managed by the common '_crypt' function.
