

hybrid_events_is_visible

hybrid_tsx_is_visible

is_attr_for_this_pmu

```
graph LR; A[hybrid_events_is_visible] --> C[is_attr_for_this_pmu]; B[hybrid_tsx_is_visible] --> C;
```

The diagram illustrates a logical relationship where two separate boolean attributes, 'hybrid_events_is_visible' and 'hybrid_tsx_is_visible', serve as inputs to a single function or attribute named 'is_attr_for_this_pmu'. The inputs are represented by white rectangular boxes, while the output is a gray rectangular box. Blue arrows indicate the flow of information from each input box to the output box.
