

inode_storage_map_alloc

task_storage_map_alloc

bpf_local_storage_map
_alloc

```
graph LR; A[inode_storage_map_alloc] --> C[bpf_local_storage_map_alloc]; B[task_storage_map_alloc] --> C;
```

The diagram illustrates a mapping or allocation process. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'inode_storage_map_alloc' and the bottom box contains 'task_storage_map_alloc'. Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box with a black border on the right. This gray box contains the text 'bpf_local_storage_map' on the top line and '_alloc' on the bottom line, indicating that both the inode and task storage maps are allocated into the bpf local storage map.
