

bus_find_next_device

driver_find_next_device

device_match_any

```
graph LR; A[bus_find_next_device] --> C[device_match_any]; B[driver_find_next_device] --> C;
```

The diagram illustrates a functional dependency or call relationship. Two white rectangular boxes on the left, labeled 'bus_find_next_device' and 'driver_find_next_device', have blue arrows pointing to a single gray rectangular box on the right labeled 'device_match_any'. This indicates that both functions utilize the 'device_match_any' function.
