drm_of_encoder_active
_endpoint

```
graph LR; A[drm_of_encoder_active_endpoint_id] --> C[drm_of_encoder_active_endpoint]; B[drm_of_encoder_active_port_id] --> C;
```

The diagram illustrates a data flow where two separate inputs, 'drm_of_encoder_active_endpoint_id' and 'drm_of_encoder_active_port_id', are combined into a single output, 'drm_of_encoder_active_endpoint'. The output box is shaded gray, while the input boxes are white with black borders. Blue arrows indicate the direction of the flow from the inputs to the output.
