

include/linux/genl
_magic_struct.h

```
graph TD; A["include/linux/genl_magic_struct.h"] --> B["linux/genetlink.h"]; A --> C["linux/types.h"]
```

The diagram illustrates a header file dependency. A central box at the top, labeled 'include/linux/genl_magic_struct.h', has two blue arrows pointing downwards to two separate boxes below it. The left box is labeled 'linux/genetlink.h' and the right box is labeled 'linux/types.h'. This indicates that the top header file includes both of the bottom header files.

linux/genetlink.h

linux/types.h
