

bpf_hash_map_seq_show

bpf_hash_map_seq_stop

__bpf_hash_map_seq_show

```
graph LR; A[bpf_hash_map_seq_show] --> C[__bpf_hash_map_seq_show]; B[bpf_hash_map_seq_stop] --> C;
```

The diagram illustrates a function pointer mapping. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'bpf_hash_map_seq_show' and the bottom box contains 'bpf_hash_map_seq_stop'. On the right, there is a single gray rectangular box with a black border containing the text '__bpf_hash_map_seq_show'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'bpf_hash_map_seq_show' and 'bpf_hash_map_seq_stop' are mapped to the same function, '__bpf_hash_map_seq_show'.
