

kmemleak_do_cleanup

kmemleak_write

stop_scan_thread

```
graph LR; A[kmemleak_do_cleanup] --> C[stop_scan_thread]; B[kmemleak_write] --> C;
```

The diagram illustrates a control flow where two functions, `kmemleak_do_cleanup` and `kmemleak_write`, both lead to the `stop_scan_thread` function. The source functions are represented by white boxes, while the target function is a gray box. Blue arrows indicate the direction of the flow from the source functions to the target function.
