

vmcs12_save_pending
_event

```
graph LR; A[vmcs12_save_pending_event] --> B[kvm_exception_is_soft]
```

A diagram showing a call from the function `vmcs12_save_pending_event` to the function `kvm_exception_is_soft`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

kvm_exception_is_soft
