

perf_event_attach_bpf_prog

perf_event_detach_bpf_prog

bpf_prog_array_copy

```
graph LR; A[perf_event_attach_bpf_prog] --> C[bpf_prog_array_copy]; B[perf_event_detach_bpf_prog] --> C;
```

The diagram illustrates a data flow or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'perf_event_attach_bpf_prog' and the bottom box contains 'perf_event_detach_bpf_prog'. On the right, there is a gray rectangular box with a black border containing the text 'bpf_prog_array_copy'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions on the left interact with or depend on the 'bpf_prog_array_copy' structure.
