

team_get_port_by_index

team_get_port_by_index_rcu

team_port_index_hash

```
graph LR; A[team_get_port_by_index] --> C[team_port_index_hash]; B[team_get_port_by_index_rcu] --> C;
```

The diagram illustrates a dependency or lookup relationship. Two functions, 'team_get_port_by_index' and 'team_get_port_by_index_rcu', are shown on the left. Arrows from both functions point to a single box on the right labeled 'team_port_index_hash', indicating that both functions utilize this hash table for port index lookups.
