

mempool_create_kmalloc_pool

mempool_init_kmalloc_pool

mempool_kfree

```
graph LR; A[mempool_create_kmalloc_pool] --> C[mempool_kfree]; B[mempool_init_kmalloc_pool] --> C;
```

The diagram illustrates a control flow where two functions, `mempool_create_kmalloc_pool` and `mempool_init_kmalloc_pool`, both lead to the execution of `mempool_kfree`. The functions on the left are represented by white boxes with black borders, while the function on the right is a gray box with a black border. Blue arrows indicate the direction of the flow from the left functions to the right function.
