

include/uapi/linux
/minix_fs.h

```
graph TD; A["include/uapi/linux/minix_fs.h"] --> B["linux/types.h"]; A --> C["linux/magic.h"];
```

The diagram illustrates a header file dependency. At the top, a grey box contains the text 'include/uapi/linux/minix_fs.h'. Two blue arrows originate from the bottom of this box and point downwards to two separate white boxes. The left box contains 'linux/types.h' and the right box contains 'linux/magic.h'. This represents the 'minix_fs.h' header file including both 'linux/types.h' and 'linux/magic.h'.

linux/types.h

linux/magic.h
