

cpuset_mem_spread_node

cpuset_slab_spread_node

node_random

```
graph LR; A[cpuset_mem_spread_node] --> C[node_random]; B[cpuset_slab_spread_node] --> C;
```

The diagram illustrates a flow where two source nodes, 'cpuset_mem_spread_node' and 'cpuset_slab_spread_node', both point to a single target node, 'node_random'. The source nodes are white rectangles with black borders, while the target node is a gray rectangle with a black border. Blue arrows indicate the direction of the flow from left to right.
