

config_num_threads_show

test_result_show

test_dev_config_show_int

```
graph LR; A[config_num_threads_show] --> C[test_dev_config_show_int]; B[test_result_show] --> C;
```

The diagram illustrates a flow or dependency where two separate components, 'config_num_threads_show' and 'test_result_show', both point to a single target component, 'test_dev_config_show_int'. The arrows are blue and point from the right side of the source boxes to the left side of the target box.
