

usb_endpoint_is_bulk_in

usb_endpoint_is_bulk_out

usb_endpoint_xfer_bulk

```
graph LR; A[usb_endpoint_is_bulk_in] --> C[usb_endpoint_xfer_bulk]; B[usb_endpoint_is_bulk_out] --> C;
```

The diagram illustrates a logical relationship between three USB endpoint-related functions. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'usb_endpoint_is_bulk_in' and the bottom box contains 'usb_endpoint_is_bulk_out'. Blue arrows originate from the right side of each of these boxes and point towards a single gray rectangular box with a black border on the right. This gray box contains the text 'usb_endpoint_xfer_bulk'. The arrows indicate that both 'usb_endpoint_is_bulk_in' and 'usb_endpoint_is_bulk_out' are inputs or conditions that lead to the 'usb_endpoint_xfer_bulk' function.
