

nhmex_mbox_get_constraint

nhmex_mbox_put_constraint

nhmex_mbox_put_shared_reg

```
graph LR; A[nhmex_mbox_get_constraint] --> C[nhmex_mbox_put_shared_reg]; B[nhmex_mbox_put_constraint] --> C;
```

The diagram illustrates a dependency or flow where two separate constraint functions, 'nhmex_mbox_get_constraint' and 'nhmex_mbox_put_constraint', both point to a single shared register, 'nhmex_mbox_put_shared_reg'. The arrows indicate that both constraints are inputs or dependencies for the shared register.
