v4l2_m2m_src_buf_remove
_by_idx

v4l2_m2m_buf_remove
_by_idx

```
graph LR; A[v4l2_m2m_dst_buf_remove_by_idx] --> C[v4l2_m2m_buf_remove_by_idx]; B[v4l2_m2m_src_buf_remove_by_idx] --> C;
```

The diagram illustrates a mapping or abstraction. On the left, there are two white rectangular boxes. The top box contains the text 'v4l2_m2m_dst_buf_remove_by_idx' and the bottom box contains 'v4l2_m2m_src_buf_remove_by_idx'. On the right, there is a single gray rectangular box containing the text 'v4l2_m2m_buf_remove_by_idx'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the destination and source buffer removal functions are mapped to a single, unified buffer removal function.
