

x2apic_send_IPI_all

x2apic_send_IPI_allbutself

__x2apic_send_IPI_shorthand

```
graph LR; A[x2apic_send_IPI_all] --> C[__x2apic_send_IPI_shorthand]; B[x2apic_send_IPI_allbutself] --> C;
```

The diagram illustrates a shorthand mechanism. Two functions, `x2apic_send_IPI_all` and `x2apic_send_IPI_allbutself`, are shown on the left. Arrows from both of these functions point to a single function on the right, `__x2apic_send_IPI_shorthand`. The shorthand function is highlighted with a gray background, indicating it is the target or implementation for the other two.
