

emulator_cmpxchg_emulated

emulator_fix_hypercalle

emulator_write_emulated

```
graph LR; A[emulator_cmpxchg_emulated] --> C[emulator_write_emulated]; B[emulator_fix_hypercalle] --> C;
```

The diagram illustrates a control flow or dependency where two functions, `emulator_cmpxchg_emulated` and `emulator_fix_hypercalle`, both point to a common target function, `emulator_write_emulated`. The target function is highlighted with a gray background, while the source functions have white backgrounds. Blue arrows indicate the direction of the flow from the sources to the target.
