

xfpregs_get

xstaterregs_get

copy_xstate_to_uabi_buf

```
graph LR; A[xfpregs_get] --> C[copy_xstate_to_uabi_buf]; B[xstaterregs_get] --> C;
```

The diagram illustrates a data flow where two separate functions, `xfpregs_get` and `xstaterregs_get`, serve as inputs to a single, larger function named `copy_xstate_to_uabi_buf`. The input boxes are white with black borders, while the output box is gray with a black border. Blue arrows indicate the direction of the flow from the inputs to the output.
